Project Design Phase-II
Data Flow Diagram & User Stories

Date	8 mar 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram represents how data moves through the Electric Vehicle analytics system.

Level-0 DFD (Overview):

1. **Data Source**
   EV datasets containing information about EV models, charging stations, battery capacity, range, speed, and price are collected from external data sources.
2. **Data Processing**
   The collected data is cleaned, transformed, and stored in a **SQL database**.
3. **Data Visualization**
   The processed data is connected to **Tableau**, where charts, maps, and graphs are created.
4. **Dashboard & Story**
   Interactive dashboards and data stories are created to visualize EV charging patterns, EV models, and efficiency comparisons.
5. **Web Integration**
   The Tableau dashboards are embedded into a **Flask web application**.
6. **End User**
   Users interact with the dashboard through the web interface to analyze EV data and insights.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Data Visualization	USN-1	View EV charging stations in India	Charging map displayed	High	Sprint-2
Customer (Web User)	Data Visualization	USN-2	Compare EV brands and models	Charts show comparison	High	Sprint-2
Customer (Web User)	Data Analysis	USN-3	View EV price and top speed	I can register & access the dashboard with Facebook Login	Medium	Sprint-2
Customer (Web User)	Dashboard	USN-4	Access EV analytics dashboard	Dashboard loads correctly	High	Sprint-3
Administrator
