Ideation Phase
Define the Problem Statements

Date	7 February 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	2 Marks

The project "Visualization Tool for Electric Vehicle Charge and Range Analysis" aims to solve these problems by providing an interactive dashboard that visualizes EV range, battery efficiency, pricing, and charging infrastructure locations. By transforming raw EV data into visual insights, the tool helps EV users compare vehicles, helps planners analyze charging infrastructure distribution, and supports informed decision-making.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	EV user	compare EV range and find charging stations	data is scattered	no single visualization tool	confused
PS-2	City energy planner	analyze EV charging station distribution	data is hard to interpret	lack of visual analytics	frustrated
